Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 0 day(s). If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (703) 305-1383. Notice of Fee Increase on October 1, 2004

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2004, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" because some fees will increase effective October 1, 2004. See Revision of Patent Fees for Fiscal Year 2005; Final Rule, 69 Fed. Reg. 52604, 52606 (May 10, 2004).

The current fee schedule is accessible from WEB site (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2004 (or mailed with a certificate of mailing on or after October 1, 2004), the issue fee paid should be the fee that is required at the time the fee is paid. See Manual of Patent Examining Procedure (MPEP), Section 1306 (Eighth Edition, Rev. 2, May 2004). If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See MPEP Section 1308.01.

Effective October 1, 2004, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$685.00
 - By other than a small entity..... \$1,370.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$245.00
 - By other than a small entity..... \$490.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$330.00
 - By other than a small entity..... \$660.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this amendment was given in a telephone interview with Brian Meyers on 10/4/2004.

In the abstract lines 9, 12, 15, change "means" to "unit".

In the abstract line 17, change "control means" to "controller".

Reasons for Allowance

2. Regarding claims 1, 9, and 11, Solve (US 6,353,645) teaches a synchronization protecting and setting system for signals received in a radio base station (col. 3 lines 17-19).

Solve teaches a first means for generating a first detecting window (uncertainty window, coarse synchronization, col. 6 lines 54 - 62), which covers a position of a

Art Unit: 2666

predetermined pattern (col. 10 lines 30-44, training sequence) provided in a reception signal received at the radio station.

Solve teaches a second means for generating a second detecting window, which covers the position of the predetermined pattern within the first detecting window (uncertainty window, fine synchronization, col. 6 line 63 - col. 7 line 7).

Solve teaches a means for detecting the predetermined pattern in the first or second detecting window (fig. 5 box 86, C satisfies the threshold criteria, col. 10 lines 48-51).

Solve teaches a means for resetting the position of the second detecting window relative to the first window (uncertainty window adjusted, col. 6 line 63 - col. 7 line 6) under a predetermined condition (estimated error from coarse synchronization, col. 6 line 63 - col. 7 line 6).

Although Solve teaches synchronization is detected by checking coincidence of the reception signal with the predetermined pattern in the first detecting window at a first frame and the detecting means detects synchronization in the second detecting window, the reference does not explicitly state the detection in the second window occurs at a subsequent frame. Solve only states that following the coarse synchronization, a fine synchronization is performed (col. 6 line 63 - col. 7 line 3).

Regarding claim 10, Solve teaches a synchronization apparatus provided in a radio base station (col. 3 lines 17-19).

Solve teaches a first window generator for generating a first synchronized word detecting window (coarse synchronization, col. 6 lines 54 - 62), which covers a position of a predetermined pattern (col. 10 lines 30-44, training sequence) provided in a reception signal received at the radio station.

Solve teaches a synchronized word detector (col. 10 lines 30 - 44) for detecting a synchronized word (training sequence, col. 10 lines 30 - 44) present in a received signal within the first synchronized word detecting window.

Although, Solve teaches a second window generator for generating a second synchronized word detecting window, which covers the position of the synchronized word detected by the synchronized word detector (fine synchronization, col. 6 line 63 - col. 7 line 7), the reference does not state as is within the same time period as the first synchronized word detecting window. Solve states that following the coarse synchronization,

Art Unit: 2666

a fine synchronization is performed (col. 6 line 63 - col. 7 line 3).

Furthermore, nothing in the prior art of the record teaches or fairly suggests a synchronized word detector outputting a synchronized word detecting pulse, a pulse generator for outputting a detecting pulse according to an AND condition of the synchronized word detecting pulse and the second synchronized word detecting window, and a register for resetting the position of the second synchronized word detecting window as related to the first synchronized word detecting window under a predetermined condition, in view of the prior art teachings of Solve, in combination with all the other limitations listed in the claim.

Conclusion

3. Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald Abelson whose telephone number is (571) 272-3165. The examiner can normally be reached on M-F.
